

First of all, take a look at the friendship soup video that you can find on our website, where you got this activity sheet.

Friendships are a little bit like making soup! The best soup is made up of lots of different ingredients; mix them together and it tastes great. The best friendships are made up of lots of different things too; but when you mix it all up, you have a great friendship.

Can you write what ingredients you think go into making a great friendship?

Starting a friendship, starts with a conversation. Fill in the speech bubbles with questions that you ask someone when you meet them for the first time.

Helpful Tips:

- 1) Smile! It is difficult to suppress smiling when seeing someone else smile.
- 2) Show that you are a good friend (for example, be honest and trustworthy)
- 3) Friendships will take time to grow; be patient it will happen.
